(LISTED BELOW)

SUPPLEMENT TO
REPORT NO.

25X1X

1. The Berdichev (28°35'E/49°54' N) airfield, Ukrainian SSR, was occupied by about 100 twin-engine bombers with radial engine, far projecting gunner's cockpit, double rudder assembly, similar to the Dc-17 plane.
2. There was intensive flying. Observed were: Formation flights, sharpshooting practices at air targets towed by fighters, releasing of bombs from planes flying individually and in formations of three, night flights of individual planes.

Comment :

The reported 100 twin-engine bombers at the field seems to be too high. The training flights observed indicate that a bomber school was possibly located at the field. From the information that the twin-engine aircraft resembled the former German Do-17 it is assumed that most of the planes were TU-2s.
